

## इंद्रायणी हॉस्पिटल अक्षय पात्र फंड' (Indrayani Hospital "Akshay Patra Fund")

We hope that this fund is always full with your good wishes, compassion, empathy and financial assistance, as the name suggests.

We announce this fund open today on the auspicious day of Gudhi Padwa, not only marking 19 years of Indrayani Hospital and Cancer Institute (IHCI) but also the beginning of yet another chapter in the successful history and development of the hospital. This scheme is a fundraiser with a difference to treat those cancer patients requiring Bone Marrow Transplant (BMT). For this our BMT unit is now getting ready with generous help from the Bajaj Foundation. BMT is many a times the only treatment for several types of blood cancer and is not only very expensive but is also not covered under most of the Government/ Health Insurance schemes. It is known that paediatric BMT has almost a 90 percent cure rate from childhood cancers(cancer in children). We are trying to get donations from several NGOs and Corporates but still we will need small help from large number of well wishers and friends. Thus our financial stream, though small, never dries up justifying our "अक्षय पात्र"!

We just want a committment from you that you will transfer part or full amount that you committed whenever our medical social worker calls you with details of amount required for a particular patient. The whole process will be 100% transparent and you will know exactly where and to whom your donation has become a life saver, a feeling that will give you immense satisfaction. You will also get tax exemption under 80G.

Let us all begin our journey together in small steps towards a larger goal.

Right now all you need to do is fill up a google form using the link given below

<https://forms.gle/gSRWUsMTVFGzhepx8>

And be ready to transfer the committed amount (part/full) whenever we contact you.

How to keep our Akshay Patra full? It is very simple.

IHCI has deposited INR 20 lacs and I have added my INR1 lac to make an auspicious figure of INR 21lacs. Whenever a patient is treated and the fund erodes, we will fill it up from your commitments.

We are sure that we will succeed together in this endeavour.
